## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1:

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to an apparatus.

Group II, claim(s) 7-19, drawn to an apparatus.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not require two body holding units, and Group II does not require the same holding surface profiles.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

**If applicant elects Group I,** he is required to elect one of the following species:

Species 1, the profile thickness is changed; species 2, the profile is changed by a spacer; species 3, the profile is changed by hardness.

**If applicant elects Group II,** he is required to elect one subspecies from each species listed, i.e. one of species 1, one of species 2.

Species 1a; figure 4; species 1b, figure 8.

Art Unit: 3723

Species 2, the attaching/detaching means is: species 2a, claws; species 2b, magnets; species 2c, thread; species 2d, spring.

Applicant is required, in reply to this action, to elect a species as directed to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4: The claims are deemed to correspond to the species listed above in the following manner:

Group I, species 1, claims 1-3; species 2, claims 1, 2 and 4; species 3, claims 1, 2, 5 and 6.

Group II, species 1a, claims 7-13, and 15, species 1b, claims 7-12, 14 and 15; species 2a, claims 7 and 16, species 2b, claims 7 and 17; species 2c, claims 7 and 18, species 2d, claims 7 and 19.

The following claim(s) are generic: claim 1 is generic to the species claims of group I; claim 7 is generic to the species claims of group II.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species of Group I each require a different structure for altering the shape of the object holder; the species of group II each require a different structure for holding the polishing body-holding units together.

Art Unit: 3723

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maurina Rachuba whose telephone number is 571 272 4493. The examiner can normally be reached on Monday-Friday.
